

PENIN FEDOR

IOS DEVELOPER

About me

I am a result-oriented developer. On the result achieved by the best solution, not by the first one I came up with. I like to explore, I like to learn and to try new things. I try to keep up with times.

Contact me

Phone (RU): 8 (926) 350 80-33
Phone (GE): +995 558 386 505
Phone (BG): +359 88 2428807

Foreign languages

- English B2

Interests

- Like music;
- Fond of playing the piano and the guitar;
- Interesting in Game Dev scripting;
- Interesting in 3D modeling.

SKILLS

I know and able to use algorithms. Able to set up client-server interaction. Experienced in developing client-server applications, as well as working with databases like MySQL and MongoDB. Took part in several IOS (Swift) pet projects.

Technical stack

Swift, IOS SDK, UIKit, GCD, URLSession, SQLite, SQL, Git

Methodologies and architectures

OOP, MVC, MVVM, VIPER, CLEAN SWIFT

WORK EXPERIENCE

Starting from the middle of my bachelor's degree and up to now I'm a freelancer. I solve different kinds of tasks from writing parsers, bots and websites to serious scripts in game industry and IOS mobile applications development. Working with people from all over the world.

One summer I worked as a self-employed in small startup. Mostly created some websites and interfaces for terminals (front+back). Some of them, you can find on my [GitHub](#).

One summer I've studied and worked in Russian company called Yandex. I've created features especially for Yandex Afisha. Most of the work is under the NDA, but you can look at one of the [open source training project](#) on my Github.

At the moment I am self-employed, implementing hundreds of different tasks in the field of game-dev. Some of the works can also be found on my [Github](#), but more than 40 repositories are hidden as private developments. Despite my experience and interest in this field, this activity is still more interesting for me as a hobby rather than as a main source of income. I am more interested in IOS development.

EDUCATION

Russian Technological University «МИРЭА»

Bachelor's degree

September 2017 - August 2021

Institute of Information Technology. Direction "Computer Engineering". Full-time education.

Moscow Aviation University

Master's degree

September 2021 - August 2023
